

Strategic alliance with Amundi

At the beginning of 1987, Banco Sabadell founded a small management company, called BanSabadell Inversión, currently Sabadell Asset Management, with the aim of offering **quality management** and providing the **best service** to its customers. A few months later, it launched its first fixed-income Investment Fund, FonSabadell, FI.

30 years later, Sabadell Asset Management has gone from being a tiny local management company to being one of the largest in Spain and, thanks to the trust placed in it by investors, today it manages assets worth more than **31 billion** euros.

Over the years, Sabadell Asset Management has specialised and expanded its product offerings. It currently has a range of 72 Collective Investment Undertakings, which are versatile and aimed at meeting the **needs of the investor**, covering practically all types of assets and geographical areas.

Throughout its history, Sabadell Asset Management and its Funds have received numerous awards and prizes, highlighting its very competitive results and the quality of its investment process. It is the first and only asset manager in Spain with a **“strong” rating**, i.e. of strong quality, from the specialised agency *Fitch Ratings*.

On 30 June, 2020 a new milestone was reached in the history of Sabadell Asset Management with the acquisition by the leading European asset management company **Amundi Asset Management**. The strong commitment to responsible investment and the good performance of its Investment Funds, added to the extensive experience of Sabadell Asset Management, strengthen its capabilities and provide the best response to the long-term saving needs of the families and companies that bank with Banco Sabadell.
