

INVESTMENT POLICY

The portfolio's exposure to public and private fixed income will exceed 70%, investing mainly in bonds with maturities equal to or less than the Fund's time horizon, money market instruments, deposits, other UCIs including those managed by this Manager (maximum 10%) and, to a lesser extent, in liquidity. The Fund invests without geographical restrictions, with maximum exposure to emerging countries of 30%. A small portion of the Fund, normally around 0.70% (maximum 1%) of its assets, is allocated to the purchase of options on European stock market indices, with the aim of obtaining additional appreciation, without total exposure to equities exceeding 30%. The Fund's target date is 29 March 2030. A fuller description of the investment policy can be found in the key information document (PRIIPs KID) available at sabadellassetmanagement.com. **WARNINGS:** This Fund may invest up to 40% in fixed income issues with low credit ratings and therefore has a high credit risk. Fixed income investments would incur losses if interest rates rise and redemptions made before maturity may result in losses for the investor.
